LESSONS

BOARDING

Our boarding and training concept is simple but also a comprehensive time managed system – all designed to provide each horse with a healthy, calm, loving and low stress environment.

We utilize holistic and natural horsemanship training designed to recognize each horse's unique character and needs based on their experiences. Combined with a non-GMO feeding program, tailored natural supplements, best in class veterinarians, natural homeopathic care (chiropractic, naturopath, nutritionists, dentists, saddle fitters) and the farm's certified farrier mark only the beginning of the basis needed for a happy, healthy horse.

Our wonderful, caring, respectful environment provides the opportunity to let the horse and owner enjoy each other more and spend quality time together.

Welcome to the Farm for long term individual care and attention, from nutrition, training and to any rehabilitation need, you experience firsthand the joy and love MariRose shows each day to the horse, owner, rider, and the surrounding farm environment.
