

LESSONS

Lessons are tailored for everyone from a beginner to the intermediate rider. Training begins and progresses with the emphasis on building greater trust between the horse and rider. Safe handling techniques and habits are always a priority from groundwork, to in the saddle and anytime you are with or around horses.

A combination of holistic and natural horsemanship principles and foundations are used to develop an understanding of how and why a horse reacts and responds to stimuli the way they do (fight or flight) and reduce or mitigate any stressful situations or reactions.

We help you reach your goal for successful growth as an equestrian, building a lifetime of mutual respect, responsibility, and trust to enhance and enjoy your experience and time together.

Owners can bring their horses to the Farm for lessons or on-site lessons and training can be arranged at the owner's own facility.
